

SomnoDent Avant™

SomnoMed's smallest, slimmest, strongest and first milled oral device with a soft liner for the treatment of mild to moderate obstructive sleep apnea (OSA).

We are proud to introduce you to our new SomnoDent Avant.

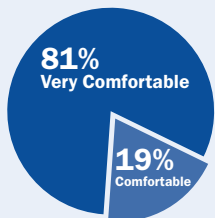

SomnoDent Avant is digitally designed for dentists who want a slim, durable device with a quality fit and finish. Our CAD-CAM manufacturing system ensures a precise and consistent fit. The SomnoDent Avant has an innovative titration system and our proprietary BFlex soft liner, all from a company that values service and quality for our dentists and their patients. With both an easy "first time" fit and fast turnaround time of about 2 weeks, your patients will value wearing one of the slimmest and most comfortable oral devices available.

- Durable SomnoDent Avant Advancement Straps provide simple calibration in 1mm increments
- An initial set of 10X straps provided with your case with additional sizes available in small, medium, large (10x per set) to cover every patients complete advancement range
- Completely digital process produces a precisely fit device with exceptional strength
- Backed by SomnoMed's dependable 3-year warranty

Be one of the first sleep experts to try our new device.
Call us at 888-447-6673, option 4.
